

# Visual Arts

The Visual Arts program is designed for students interested in pursuing a structured study in two and three-dimensional design. The curriculum will guide students toward the development of skills, concepts, and imaginative exploration in a wide variety of media and techniques. Students experience courses in drawing, painting, graphic design, sculpture, architecture, crafts, and more.

The program will help students expand their creativity, knowledge, and discipline through the making of art, discussion, critique, and observation. Students will develop their critical thinking skills, fundamental theory, and historical perspective.
