FULLERTON JOINT UNION HIGH SCHOOL DISTRICT OPENS COMPRESSED NATURAL GAS (CNG) FUELING STATION

The Fullerton Joint Union High School District (FJUHSD) hosted a Ribbon Cutting Ceremony for the District's new Compressed Natural Gas Fueling Station. The ceremony was held on Tuesday, December 5, 2017, at 11:30 a.m. at the District Transportation Center located at 1021 S. Leslie St., La Habra.

Currently, nineteen district buses run on compressed natural gas (CNG) and are fueled at the FJUHSD bus yard through time-fill and fast-fill dispensers. The majority of the buses were acquired through the South Coast Air Quality Management District's (SCAQMD) incentive program where clean-burning CNG buses are offered as replacements for older diesel and gas burning buses. FJUHSD expects to replace most of its diesel- and gas-burning bus fleet with CNG vehicles in the coming years.

Grants from SCAQMD, Mobile Source Air Pollution Reduction Review Committee (MSRC), and the California Energy Commission (CEC) helped fund the necessary \$3.2 million upgrades to the CNG infrastructure. These upgrades also include a public, fast-fill CNG station where commuters, businesses, municipalities, and local educational agencies (LEA's) can fill vehicles.

Public CNG stations are commonly located through the fuel finder app CNG NOW (www.cngnow.com) and the United States Department of Energy's Alternative Fueling Station Locator (www.afdc.energy.gov). Consumers are able to utilize credit, debit, or fleet cards to fuel vehicles 24 hours per day, 7 days per week. The school district expects to use the additional revenue from the public CNG station to fund further vehicle replacement.
