

PSAT FOR JUNIORS ONLY

In an effort to make sure all our Lancers feel both safe and supported, Sunny Hills's Guidance Department wanted to touch base with all potential 11th grade PSAT testers so students and families can feel fully informed about the decision of taking the PSAT this school year.

The PSAT is optional and only recommended if the SAT is needed or recommended for the student's specific post high school plans. We recommend that students and families review the most updated admission requirements to decide if taking the PSAT is something that fits their academic goals. If you have questions, please reach out directly to your counselor.

YOUR SAFETY MATTERS

As we are sure you are aware, COVID-19 has impacted many aspects of education, and standardized testing is certainly one of them. In recent months there have been significant changes announced to 4-year college admission exam requirements (SAT/ACT). Please see some points of information below as you decide whether or not this year is the right year for you to register to take the PSAT:

UNIVERSITY UPDATES

The University of California (UC) system of schools initially moved to a "test optional" policy for the incoming freshman class of 2022.

The California State University (CSU) system of schools cancelled the use of SAT/ACT scores for the current 12th graders but intends to reinstate the old SAT/ACT requirements if possible. At this time, it is unclear if the CSU will be able to reinstate the SAT/ACT requirement for current 11th graders.

For private colleges/universities and out-of-state public schools, please check the school's website to verify, but most schools have moved to a testing optional policy.

The PSAT is an in person, paper/pencil test that will be given on January 26.

Sales will begin the week of January 19th via SHHS Webstore only.
